

Nurelle D - Product information

Nurelle D is a systemic and active insecticide.

Mode of action:

Nurelle D has a shock and contact effect, and it systemically acts by ingestion, providing a 2-3 week long protection, thus reducing the number of treatments in a season. The effect of this insecticide manifests itself on all insect mobile forms (adults, larvae and nymphs), presenting secondary action in the control of mites, significantly reducing the risk of attack.

Time of application:

At the first sign of pest attack; it is recommended to apply it at lower temperatures (early in the morning or in the evening). We recommend maximum application / season for fruit trees

Break time:

14 days for potatoes, tomatoes, fruit trees.

Treated plants:

Potato, Tomato, Apple, Peach, Plum, Currant,

Combat insects:

Colorado Beetle, Marbled Miner, Circular Miner, Moth, Aphid, Hair Flea, Peanut Salt Mousse, Muffin Muffler, Woolly Apple Aphid

Culture	Dangerous agent	Dosage
Potato	Leptinotarsa decemlineata	0.4-0.5 l/ha
Tomato in greenhouse	Macrosiphum euphorbiae	0.06 l/ha
	Adoxophyes orana	0.1%
Apple	Phyllonorycter blancardella	0.075%
	Leucoptera scitella	0.075%
	Eriosoma lanigerum	0.075%
Pear	Psylla pyri (Puricele melifer al parului)	0.075%
Prune	Eurytoma schreineri	0.075%
	Synanthedon tipuliformis	0.075%
Black currant	Dasineura tetinsu	0.075%

Additional Information

Destination use	Population, Professionals, Trained personnel
Shelf life (years)	2
Formulations	EC-Emulsifiable concentrate
Active Substances	Chlorpyrifos, Cypermethrin
Active Substance Concentration	50 g/litre; 500 g/litre
Crops	Apple tree, Pear tree, Plum tree, Potato, Tomatoes
Bio Crops	Not suitable
Mode of action	contact
Crop pests	Colorado potato beetle, goat moth, greenbug, summer fruit tortrix, woolly apple aphid
Dosage	No
Application Type	Low pressure spray, ULV-Cold Fog
Odor	strong irritant
